

On behalf of the Vice President for Operations and Public Safety

Subject: Unmanned Aircraft Systems (UAS) at The University of Vermont

Dear Applicant,

The UVM Unmanned Aircraft System Work Group (UASWG) is responsible for approving applications to fly a UAS on University property and/or at University sponsored events held off-campus. The University expects all applicants to fully comply with all current FAA regulations pertaining to small UAS flights, and the University's UAS University Operating Procedure (UOP) at Attachment 1.

Applicants should submit their application, <u>Attachment 2</u>, to the UASWG chair, John Marcus by email at <u>emergency@uvm.edu</u>, with all required documents (see checklist below) at least <u>15</u> <u>business days prior</u> to the day the applicant wants to fly. The application and all additional forms and/or documents must be completed, signed and dated.

An application is required for each initial request to operate UAS by any UVM affiliate or non-UVM organization on University property and/or at University sponsored events held off-campus. UVM affiliate groups that regularly operate UAS may be granted an allowance to utilize equivalent UASWG-approved digital systems to replace the paperwork application packet.

Special points of emphasis and/or guidance to applicants:

- Model aircraft, UAS, and drones flown for hobby or recreational purposes are <u>not</u> permitted on the UVM campus, or at University sponsored events off-campus.
- Flights are limited to flying aircraft operated under FAA Part 107 regulations, UAS requested (or as amended) in the UVM's FAA COA/333 Exemption application, or as allowed in accordance with the most current FAA regulations as applied to UAS.
- Proof of insurance (certificate) showing minimum coverage (\$2.5M for bodily injury and/or property damage liability; \$25K for medical expenses to third parties; and \$10K for dismemberment or death) must be submitted with the application.
- All operating documents must be accessible during UAS flights/operations and made available to any UVM or local law enforcement upon request.
- All aircraft must be identified by serial number and have FAA identification markings visible on the aircraft.
- Some form of risk assessment must be included with the application. The risk assessment should identify the risks associated with the proposed flight, what the impacts and likelihood of the risks are should they occur, what mitigation strategies will be employed to reduce the risk impact or likelihood, and who is responsible for implementing those strategies.
- A map showing the planned flight in Keyhole Markup Language (KML) or Geographic Information System (GIS) layer should be provided with the application.

## UNIVERSITY OPERATING PROCEDURE

**UAS WORKING GROUP** 

On behalf of the Vice President for Operations and Public Safety

#### Checklist:

Obtain advanced approval to fly on UVM property or at UVM sponsored events
on/off
campus from UVM's UASWG.

- ☐ Submit completed application along with:
  - Attach proof that the remote pilot in charge is certified or licensed to operate the UAS.
  - o Attach proof of FAA UAS registration.
  - Attach proof of private insurance (usually a certificate from your insurer) clearly indicating that the minimum coverage is equal to, or greater than the following:
     \$2.5M for bodily injury and/or property damage liability; \$25K for
    - \$2.5M for bodily injury and/or property damage liability; \$25K for medical expenses to third parties; and \$10K for dismemberment or death.
  - Attach a risk assessment or pre-flight checklist for the flight(s) (may be embedded in the application or attached as a separate document)
  - Attach a map showing the planned flight in Keyhole Markup Language (KML) or Geographic Information System (GIS) layer.
  - Attach a signed UVM risk acknowledgment (indemnification) of UAS operations for each participant.
  - Verify Burlington International Airport (BTV) has been notified and acknowledges the planned flight (if within 5 miles of BTV). Attach proof of airspace authorization when flying within BTV Class C airspace.
  - o Attach any relevant and FAA-approved operational waivers, if requesting to operate outside the limitations of an FAA regulation.

Questions and/or concerns should be addressed to the UASWG Chair either by email at emergency@uvm.edu, or by phone at (802) 656-4363.

## **UAS Flight Operation Application**

#### Please Sign and Date

By signing this document, you are indicating that you will comply with all University Policies and Procedures and FAA Guidance, Rules, and Regulations relating to UAS operations.

As part of the application:

- Attach proof that the pilot in charge is certified or licensed to operate the UAS.
- Attach proof of FAA UAS registration.
- Attach proof of private insurance (usually a certificate from your insurer) clearly indicating that the minimum coverage is equal to, or greater than the following: \$2.5M for bodily injury and/or property damage liability; \$25K for medical expenses to third parties; and \$10K for dismemberment or death.
- Attach a risk assessment or pre-flight checklist for the flight(s) (may be embedded in the application or attached as a separate document)
- Attach a map showing the planned flight in Keyhole Markup Language (KML) or Geographic Information System (GIS) layer.
- Attach a signed UVM risk acknowledgment (indemnification) of UAS operations for each participant.
- Verify FAA approval for planned flight operation in restricted airspace (if within 5 miles of Burlington International Airport [BTV]) and attach associated documentation.

UAS FLIGHT	OPERATION -	- RISK	<b>ASSESSMENT</b>
------------	-------------	--------	-------------------

This form may be used as a template to conduct a risk assessment related to the proposed UAS operation. List the potential risks in the left column and proposed mitigation and management techniques for that risk in the right column. An existing pre-flight checklist and/or other form of existing risk assessment may be submitted with the application in lieu of this assessment form.

#### **ATTACHMENT 4**

## **Risk Acknowledgement of Unmanned Aircraft Systems Operations**

In consideration for the operation of an unmanned aircraft system on University Property or for University purposes,agrees to the following:
(Person/operator responsible UAS)
<ul> <li>UAS Shall not be operated in a manner to create a hazard to persons or their property.</li> <li>UAS Operators shall take into consideration the weather conditions.</li> </ul>
<ul> <li>Shall not attempt flight operations beyond their experience and beyond their systems' capabilities.</li> </ul>
<ul> <li>Shall not be under the influence of any controlled substance.</li> </ul>
UAS shall be operated according to the Federal Aviation Administration guidance
applicable to the University ( <u>www.faa.gov/uas/</u> ).
• Shall be labeled with the owner/operator's contact information.
<ul> <li>Shall give way to, and not interfere with, any manned aircraft.</li> <li>If manned aircraft is visible, audible, or could plausibly arrive in the vicinity of the lower airspace, the operator of the UAS must immediately take the safest course of action.</li> </ul>
<ul> <li>Shall not occur within 5 miles of Burlington International Airport without prior notification and approval of the KBTV Air Traffic Control and FAA, with proof provided to the Chair of the UAS Working Group.</li> </ul>
• Shall not occur on any University property without notification and approval of the Chair of the UAS Working Group.
• Shall not occur on any University property without prior notification to UVM Police Services.
• Operators shall adhere to the practices outlined in their application to operate a UAS.
